## COMPANY PROFILE

DI CLASSE is a Japanese design company and an interior brand, opened in 1990 by Domei Endo. Since 1994 the company has released its original products.

Domei thinks lighting is something more than just illuminating. He particularly focuses on the colour of light. Foresti lamps represent dappled light through leaves which create kaleidoscopic shadows. He tries to recreate the phenomenon seen in nature that offers therapeutic healing.

'Bring nature indoors' - his design philosophy has been well accepted. Furthermore, DI CLASSE emphasises environment and society. Domei has taken up the role of an advisor to reconsider local resources and the potentiality to regenerate local society by fusing design and production.

DI CLASSE was established in Japan and our products are now seen over 2,000 shops. The company has showrooms in Tokyo and in Osaka. As a response to the growing international demand, DI CLASSE has started exporting worldwide and DI CLASSE London was opened in 2010.

### 1 Paper-Foresti grande-R

pendant lamp

material	steel, glass, paper (Photocatalytic)
shade size	Φ750, H700
bulb	E-27 fluorescent bulb 21watt
weight	9.6kg

"Air clean paper" is a material which cleans the air like natural plants do. Similar to Photosynthesis, this chemical reaction is called "Photocatalyst" and it is activated by weak ultraviolet rays from fluorescent light bulbs. Photocatalytic reactions are used to help nature as it cleans and purifies the environment using light as energy.
